

Lattice Completes Additional Video Visitation Installations for Repeat Customers in Oklahoma

PENNSAUKEN, NJ, February 6, 2014 (Marketwire) -- Lattice Incorporated (OTCQB: LTTC) (“Lattice” or the “Company”), a cloud-solutions provider of inmate management network systems for correction facilities, completed the installation of additional video visitation systems at the McIntosh County Criminal Justice Center in Eufaula, Oklahoma, and the Canadian County Jail in El Reno, Oklahoma.

The latest installations represent expansion of services for existing Lattice clients. Lattice initially completed full implementation of its proprietary Integrated Corrections Operating Network (ICON) platform at the McIntosh County and Canadian County facilities in December 2013. Both facilities have now expanded their number of video visitation stations, while Canadian County also opened a new 120 bed facility where Lattice’s video visitation technology was recently installed.

Paul Burgess, CEO of Lattice, stated, “While we’ve only been working with these facilities for a short period of time, it’s obvious they see the value in our technology, and we’re pleased they’ve chosen to deepen their relationship with us so soon. Over the past four years, we’ve made substantial inroads in the region, and while we continue to exploit our growing dominance in the Oklahoman corrections market, we’re looking to repeat this success in a growing number of additional markets where we’ve more recently begun operating. With the ease of scalability that we’ve demonstrated, we’re confident we’ll see substantial revenue growth in 2014 and beyond.”

Lattice’s ICON platform is a robust communications system for correctional facilities, offering telephone calls, voicemail, video visitation, e-mail, text messaging, and social media. ICON also provides facility management and accounting packages that enable efficient management of all prison processes, including telephone monitoring, commissary purchases, point-of-sale kiosks, biometrics, booking, incident reporting, and other value added services designed to reduce administrative overhead for corrections facilities. ICON has been proven to improve efficiency and accountability for all types of correctional facilities, ranging from large multi-facility operators to small individual facilities.

About Lattice Incorporated

Lattice Incorporated provides advanced information and communications technology solutions to corrections facilities globally. The Company's innovative, cost-effective solutions leverage its proprietary Nexus platform, a real-time transaction processing engine, to develop and deliver customized cloud-based software applications with military-grade security for facilities that require highly secure solutions.
