

Lattice Expands Service in Georgia with Two New Facility Installations

PENNSAUKEN, NJ, April 8, 2014 (Marketwire) -- Lattice Incorporated (OTCQB: LTTC) (“Lattice” or the “Company”), a cloud-solutions provider of inmate management network systems for correction facilities, announced completion of multiple video visitation station installations at two county jails in Georgia.

The completed installations replaced analog systems at the Gordon County Jail in Calhoun, Georgia, and the Oconee County Jail in Watkinsville, Georgia. A total of 64 video visitation stations were installed at the facilities.

Lattice’s video visitation platform provides web-based communications for friends and family to communicate with inmates from their home, office, or anywhere equipped with a computer, internet access, and webcam, providing a convenient alternative to traveling to correctional facilities for on-site visitations.

“We’re seeing ongoing strong demand for our unique video visitation platform from facilities nationwide,” stated Paul Burgess, CEO of Lattice. “As we gain further penetration into new correctional facilities with this platform and other components of our complete ICON system, we’re building a sizable pipeline of leads for future cross-selling opportunities.”

Lattice’s video visitation system, a component of the Company’s proprietary ICON platform, is ideal for both new construction and renovation projects. Its innovative design utilizes the benefits of IP network communication rather than analog audio and video signals, providing significant reductions in conduit and cabling costs, as well as greater flexibility and expandability.

ICON is Lattice’s proprietary integrated communications system for correctional facilities, offering telephone calls, voicemail, video visitation, e-mail, text messaging, and social media. The platform also includes a facility management and accounting package that enables efficient management of all prison processes, including telephone calls, commissary purchases, point-of-sale kiosks, biometrics, booking, incident reporting, and more. ICON’s automated payment processing, billing, and accounting features reduce administrative overhead for corrections facilities. ICON is designed to improve efficiency and accountability for correctional facilities ranging from large multi-facility operators to small individual facilities.

About Lattice Incorporated

Lattice Incorporated provides advanced information and communications technology solutions to corrections facilities globally. The Company's innovative, cost-effective solutions leverage its proprietary Nexus platform, a real-time transaction processing engine, to develop and deliver customized cloud-based software applications with military-grade security for facilities that require highly secure solutions.
