

Lattice Receives Certification to Provide Telecommunications Services in Alabama

Alabama currently has an inmate population of more than 40,000

PENNSAUKEN, NJ, June 23, 2014 (Marketwire) -- Lattice Incorporated (OTCQB: LTTC) (“Lattice” or the “Company”), a cloud-solutions provider of inmate management network systems for correction facilities, received certification from the Alabama Public Service Commission to begin providing telecommunications services in Alabama correctional facilities.

In the state of Alabama, there are currently more than 40,000 inmates across 15 major correctional facilities and 99 county jails.

“Lattice currently operates in 26 states nationally, providing a suite of technology sales and services, including our high-demand video visitation technology for correctional facilities,” stated Paul Burgess, CEO of Lattice. “With this certification in Alabama, we are now certified to provide telecommunications services in 14 states across the country. We are well positioned to capitalize on the opportunity in Alabama, with an established office in the state as a result of our acquisition of Innovisit, and we look forward to helping these facilities cost-effectively improve operations by leveraging our proprietary Integrated Corrections Operating Network (“ICON”) platform.”

ICON is Lattice's proprietary integrated communications system for correctional facilities, offering telephone calls, voicemail, video visitation, e-mail, text messaging, and social media. The platform also includes a facility management and accounting package that enables efficient management of all prison processes, including telephone calls, commissary purchases, point-of-sale kiosks, biometrics, booking, incident reporting, and more. ICON's automated payment processing, billing, and accounting features reduce administrative overhead for corrections facilities. ICON is designed to improve efficiency and accountability for correctional facilities ranging from large multi-facility operators to small individual facilities.

About Lattice Incorporated

Lattice Incorporated provides advanced information and communications technology solutions to corrections facilities globally. The Company's innovative, cost-effective solutions leverage its proprietary Nexus platform, a real-time transaction processing engine, to develop and deliver customized cloud-based software applications with military-grade security for facilities that require highly secure solutions.
