

## **Winkler County Texas Chooses Lattice's ICON Platform**

**Texas represents the second largest state and county inmate population in the U.S.**

PENNSAUKEN, NJ, September 22, 2014 (Marketwire) -- Lattice Incorporated (OTCQB: LTTC) ("Lattice" or the "Company"), a cloud-solutions provider of inmate management network systems for correction facilities, signed a contract to provide inmate telecommunications services at the 101-bed Winkler County Detention Center in Kermit, Texas, expanding the Company's footprint in the second largest corrections market in the U.S.

There are approximately 248,000 inmates currently incarcerated across more than 500 county and state corrections facilities in Texas, representing a significant market opportunity for Lattice's Integrated Corrections Operating Network ("ICON") platform. Lattice has been providing inmate solutions in Texas since 2011, and the Winkler County Detention Center is the Company's 8<sup>th</sup> facility installation in the State.

ICON is an integrated communications system for correctional facilities, offering telephone calls, voicemail, video visitation, e-mail, text messaging, and social media. The platform also includes a facility management and accounting package that enables efficient management of all prison processes, including telephone calls, commissary purchases, point-of-sale kiosks, biometrics, booking, incident reporting, and more. ICON's automated payment processing, billing, and accounting features reduce administrative overhead for corrections facilities. ICON is designed to improve efficiency and accountability for correctional facilities ranging from large multi-facility operators to small individual facilities.

"We continue to gain sales momentum in Texas and other states nationally, and we anticipate nine additional contract awards over the next three months," stated Paul Burgess, CEO of Lattice. "Inmate telecom services provide us with a recurring base of high margin cash flow as we seek to cross sell other components of our full ICON platform, including our industry-leading video visitation system. With more and more facilities recognizing the cost-effective operational improvements provided by our technology solutions, we're in an ideal position to grow significant market share in the quarters ahead."

### **About Lattice Incorporated**

Lattice Incorporated provides advanced information and communications technology solutions to corrections facilities globally. The Company's innovative, cost-effective solutions leverage its proprietary Nexus platform, a real-time transaction processing engine, to develop and deliver customized cloud-based software applications with military-grade security for facilities that require highly secure solutions.
