

LATTICE IMPLEMENTS INMATE COMMUNICATIONS SYSTEM IN WAYNE COUNTY, PA CORRECTIONAL FACILITY

Installation is the Company's First in Pennsylvania Market

PENNSAUKEN, NJ, March 24, 2017 -- Lattice Incorporated has installed its Nexus Inmate Communications System at the Wayne County Correctional Facility in Honesdale, PA. This is a significant milestone, as it marks Lattice's first installation in Pennsylvania, an important growth market for the Company.

Lattice was chosen as the successful vendor after a public RFP process. The company's reputation for industry-leading services, support and system performance were several of the factors considered during the evaluation process. Additionally, the Nexus platform will enable Wayne County's inmates to communicate frequently with their family and friends. Maintaining communications with loved ones can help promote improved inmate morale during incarceration and reduce recidivism upon release.

"Lattice's Inmate Communications System will deliver significant benefits to our inmates and our facility," stated Kevin Bishop, Warden of the Wayne County Correctional Facility. "When our inmates communicate frequently with their family and friends, it can result in better morale and behavior, and reduce the likelihood of repeat offenses when they are released. Additionally, Lattice's system automates multiple administrative functions and offers investigative tools, providing more efficient operations at our facility and a safer community in general."

"The new installation of our Nexus Inmate Communications System at Wayne County will deliver greater efficiencies to the facility, reduce the administrative burden on its staff, and help improve the well-being of its inmates," noted Paul Burgess, CEO of Lattice. "This is a significant first installation in Pennsylvania, a key state in our overall growth strategy. We look forward to growing our partnership with the Wayne County facility."

About Lattice Incorporated

Lattice's Corrections Operating Platform™ (COP) is an integrated network of highly secure solutions, including inmate communication systems, prepaid calling options, voicemail, video visitation and arraignment, and mobile devices. Lattice's inmate management module efficiently manages prison processes, including communications monitoring, commissary purchases, account funding and billing, biometrics, booking, incident reporting, and more.
