

Lattice Signs Two New Contracts for its ICON Platform

The two new installations of ICON will expand the Company's service footprint in Oklahoma to 32 facilities

PENNSAUKEN, NJ, September 29, 2014 (Marketwire) -- Lattice Incorporated (OTCQB: LTTC) ("Lattice" or the "Company"), a cloud-solutions provider of inmate management network systems for correction facilities, signed two contracts for its Integrated Corrections Operating Network ("ICON") platform. The installations will take place at the 32-bed Grant County Jail in Medford, Oklahoma, and the 128-bed Custer County Jail in Arapaho, Oklahoma.

The latest ICON installations for Grant County and Custer County are expected to be completed in October and December respectively. Once complete, Lattice will be servicing 32 correctional facilities in Oklahoma.

"We now work with more than a third of the county correctional facilities in Oklahoma," stated Paul Burgess, CEO of Lattice. "This sizeable market share bodes well for our sales efforts both within Oklahoma and the surrounding states. As more facilities become aware of the Lattice brand and our industry-leading technology solutions, we believe we're in a strong position to accelerate revenue growth."

ICON is an integrated communications system for correctional facilities, offering telephone calls, voicemail, video visitation, e-mail, text messaging, and social media. The platform also includes a facility management and accounting package that enables efficient management of all prison processes, including telephone calls, commissary purchases, point-of-sale kiosks, biometrics, booking, incident reporting, and more. ICON's automated payment processing, billing, and accounting features reduce administrative overhead for corrections facilities. ICON is designed to improve efficiency and accountability for correctional facilities ranging from large multi-facility operators to small individual facilities.

About Lattice Incorporated

Lattice Incorporated provides advanced information and communications technology solutions to corrections facilities globally. The Company's innovative, cost-effective solutions leverage its proprietary Nexus platform, a real-time transaction processing engine, to develop and deliver customized cloud-based software applications with military-grade security for facilities that require highly secure solutions.
